About Project

The "Anghel Saligny - Beyond the Bridge" project aims to promote and celebrate the remarkable contribution of the ingenious engineer Anghel Saligny to the development of infrastructure and technology in Romania at the end of the 19th century and the beginning of the 20th century.

The project aims to bring to the public's attention the engineering work of Anghel Saligny, going beyond the Cernavodă bridge, as the title suggests, and will also highlight other works by engineer Anghel Saligny, works such as the silos in the port of Constanta, the Power Plant of the Port of Constanta or the Old Stock Exchange - dock 17.

About

Project

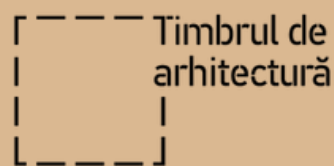

The motivation for this cultural project stems from the desire to "cross the Cernavodă bridge" and to get to know Anghel Saligny through the lens of other constructions to which he had an important and valuable contribution. The project is being implemented in 2024 with the financial support of the Order of Architects of Romania and will run for a period of 8 months.

The project will involve documenting and researching Anghel Saligny's work, his biography and the historical context in which he lived and worked, with these data to be presented to the general public in the form of a brochure. At the same time, guided tours will be organized to visit the buildings, where participants will enter the engineer's universe and learn fascinating details about each building from historians and specialists. In order to bring Saligny's achievements closer to the public, we will create models of the buildings to which the engineer had a significant contribution. We also plan to organize two captivating exhibitions that will present Saligny's plans, sketches and ingenious achievements in the field of construction.

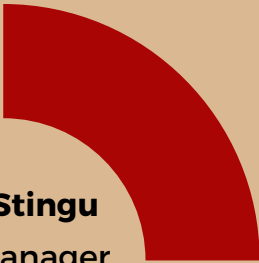

The "Anghel Saligny - Beyond the Bridge" project is addressed to the general public, with a special focus on pupils, students, professionals in the fields of engineering and history, but also to all those interested in the history and cultural heritage of Constanta and implicitly the Dobrogea region.

Timeline

In the first stage of the project, we will start research and documentation activities and create a photographic stock. Later, we will start organizing guided tours for visitors.

After completing the research and documentation stage, models of the constructions to which Anghel Saligny had a significant contribution will be made, and these will be exhibited in two traveling exhibitions in Constanța and Bucharest.

The project will be completed by presenting the results in the form of brochures and written articles.

Association

Youth Vision for Society

The Youth Vision for Society (YVS) Association is a non-governmental organization in Romania that aims to promote and strengthen civic involvement through initiatives and projects in civic education, culture and heritage, environmental protection and supporting financial and entrepreneurial education.

The association's current action plan aims to intensify and improve cultural development and valorization of cultural heritage in rural communities in the Dobrogea region.

In 2023, the association implemented the project "Danube Road - Dobrogini, part I", which aims to capitalize on the cultural and natural heritage of the Dobrogea area, especially in the localities along the Danube. Through this project, 4 cultural routes were proposed that included museums, archaeological sites, fortresses, historical monuments and other historically and traditionally significant places.

Previously, YVS has carried out civic activities and projects for youth, educational projects, volunteering actions, personal development seminars for youth, and greening projects. An example of a project is "Career Compass", which offers young people new perspectives on the jobs they want to pursue after high school. The association has also supported important campaigns, such as those to promote voting in the European Parliament elections and to prevent and combat the COVID-19 pandemic. In 2022, YVS was active in managing the flow of refugees from Ukraine, organizing transport and providing support for Ukrainian refugees.
